

NEW

ROAD PLATE LIFTER

CAPACITY: 5.0T

- ✓ Manufactured and certified to AS4991
- ✓ Individual serial number on each unit – not batch number
- ✓ Individual test certificate
- ✓ Rated to a minimum safety factor of 5:1

Lift and position road plates safely and securely with the **NEW OzBlok Road Plate Lifter**. Robust and easy to use, the OzBlok Road Plate Lifting System is the only one on the market that is ready to use from the box with an individual serial number on each unit (not just a batch number) eliminating the need to individually tag each unit.

NEW

ROAD PLATE LIFTER

The **OzBlok Road Plate Lifter** system comprises of a receiver plate and a lifting tool. Once the receiver is flush welded at the centre of a steel trench plate, the lifting tool can be inserted into the receiver and locked into position before a hook is attached to the middle of the lifting tool. The flush welding reduces risk of tripping and allows for plates to be conveniently stacked.
